Software Developer

[Github](#)

SUMMARY

Dedicated Software Developer with expertise in backend development, particularly using Node.js and Express.js. Proficient in crafting scalable systems and adept at learning new technologies. Currently pursuing a Bachelor's degree in Biochemistry while maintaining exceptional academic performance. Skilled in various programming languages and frameworks, with a passion for creating efficient, high-performance applications.

EDUCATION

National Institute of Information Technology (NIIT), Ikorodu

June - December, 2021

Lagos State University

Bachelor's Degree in Biochemistry
2020 - Present

SKILLS

- Languages: JavaScript (ES6+), TypeScript, Python, C#, Go (learning)
- Backend: Node.js, Express.js, FastAPI
- Frontend: HTML, CSS, React.js, Next.js
- Databases: MongoDB, MySQL, Redis
- DevOps: Git, Docker
- Cloud Services: AWS (basic familiarity)
- Operating Systems: Windows, Linux
- (Ubuntu, Fedora, Kali)

PROFESSIONAL EXPERIENCE

Backend Developer

Writers Network International | November 2023 - Present

- Developed and maintained RESTful APIs using Node.js and Express.js
- Implemented database solutions using MongoDB and MySQL
- Collaborated with frontend developers to integrate server-side logic with user interfaces
- Utilized Docker for containerization and deployment of microservices
- Implemented caching strategies with Redis to optimize application performance

PROJECTS

Shaed - Chat Application

- Developed a real-time chat application using Node.js and Socket.io
- Implemented user authentication and message persistence using MongoDB
- Utilized Redis for caching frequently accessed data to improve response times
- Utilized Docker for containerization during deployment to production environment alongside the Bun runtime.
